

## IH-635 MANAGED LANES PROJECT, SEG. 3.2

**Location:**  
Dallas, Texas

**Owner:**  
Texas Department of  
Transportation

**Client:**  
Ferrovial Agroman

**Construction Cost:**  
\$1 Billion

**Completion Date:**  
December, 2015

### **Project Description**

---

This P3 project was the construction of 4 miles of 6 lane depressed tollway from Rosser Road to SH 75 on the north side of Dallas, Texas. 8 lanes of freeway and 4 to 6 lanes of frontage roads were also reconstructed. One major interchange was reconstructed at DNT and several smaller slip lane connections were relocated. Traffic was maintained on the existing interstate at all times during construction. Project included new traffic signal systems, lighting, ITS and tolling.

JSE was the lead consultant for this complex project.

### **Project Data:**

<b>Total Length:</b>	4 miles
<b>Time to Complete Plans:</b>	20 months
<b>Number of Bridges:</b>	43 new bridges
<b>Lane Miles:</b>	75 miles
