

## I-64 ROAD RECONSTRUCTION IN POSEY COUNTY

**Location:**  
Posey County, Indiana

**Owner:** INDOT

**Client:** INDOT

**Construction Cost:**  
\$33,000,000

**Completion Date:** 2001

### Project Description

---

This project involved reconstruction of I-64 from the Illinois State line to the S.R. 165 interchange. The 15 mile long project involved over 2.5 miles of mainline pavement replacement, over 12 miles of pavement rehabilitation/rubblization including rehabilitation of the on and off ramps at the Griffin interchange. The project included new underdrains, new pipe installations, pipe rehabilitations, new traffic signs and pavement markings.

The project also included the rehabilitation of seven sets of twin bridges. The total length of rehabilitated bridges on the project was over 4400'. The bridges ranged from a simple concrete deck overlay of a 72' long, three span reinforced concrete slab bridge to a complex deck replacement of a 1100' long, 6 span welded plate girder bridge. JSE provided project management, utility coordination, maintenance of traffic, road, bridge, drainage and traffic design services for this \$33,000,000 interstate reconstruction project. The construction plans were completed in a period of fourteen months.

### Project Data:

<b>Total Length:</b>	15 miles
<b>Time to Complete Plans:</b>	14 Months
<b>Number of Bridges:</b>	7 Bridge Rehabs
